About me

Hey there!, Im 16 and i seeking a role in a product company, I value clean code, amazing colleagues, and well-defined processes. Excited to connect and work together!

Experience

2022 – 2023 — Valhalla || Junior Front-end Developer

Worked in my first team. Developed layouts for both simple landing pages and large commercial websites.

- Developed business logic for the frontend.
- Gained a lot of experience with version control tools such as Gitlab.

2023 – 2024 — Marganets || Front-end Specialist

Constantly communicated with clients, discussed project-related issues, fully overseeing projects from their inception to launch.

- New web development technologies as Nuxt.js, Docker, Prisma and more
- Developed and maintained user interfaces using Vue.js.
- Refactored existing code to improve performance and readability.
- Mentored and trained junior developers.
- Conducted code reviews and participated in architectural discussions.
- Fixed bugs and resolved issues identified during testing.
