ABOUT ME 02

Hey there!, Seeking a role in a product company, I value clean code, amazing colleagues, and well-defined processes. Excited to connect and work together!

EXPERIENCE 03

2022.09 - 2023.03

Valhalla Studio || Junior Front-end Developer

Worked in my first team. Developed layouts for both simple landing pages and large commercial websites.

- Developed business logic for the frontend.
- Gained a lot of experience with version control tools such as Gitlab.
- Worked in a team.

2023.06 - 2024.01

Marganets Studios || Front-end Specialist

Constantly communicated with clients, discussed project-related issues, fully overseeing projects from their inception to launch.

Responsibilities

- New web development technologies as Nuxt.js, Docker, Prisma REST APIs and more.

.

- Developed and maintained user interfaces using Vue.js.

- Integrated and worked with RESTful APIs for data fetching and submission.

- Refactored existing code to improve performance and readability.

- Developed complex forms and validation using Vue.js.

- Conducted code reviews and participated in architectural discussions.

- Fixed bugs and resolved issues identified during testing.

- Mentored and trained junior developers.
